

First, establish the output directory.

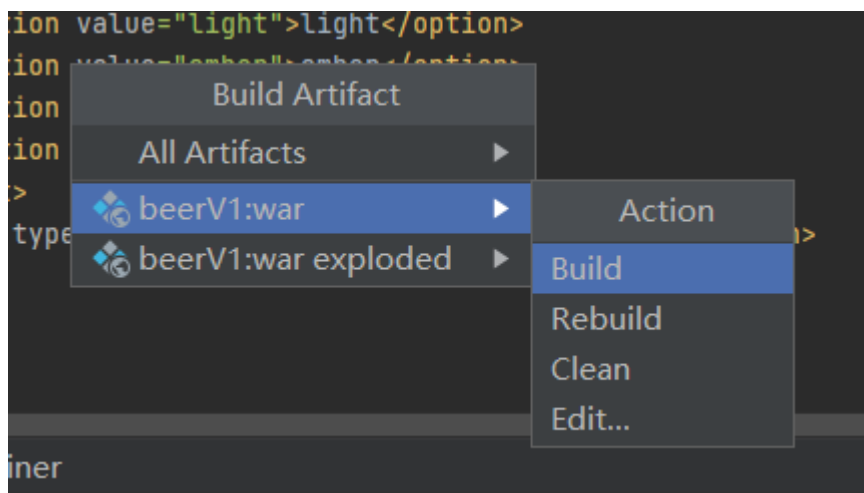

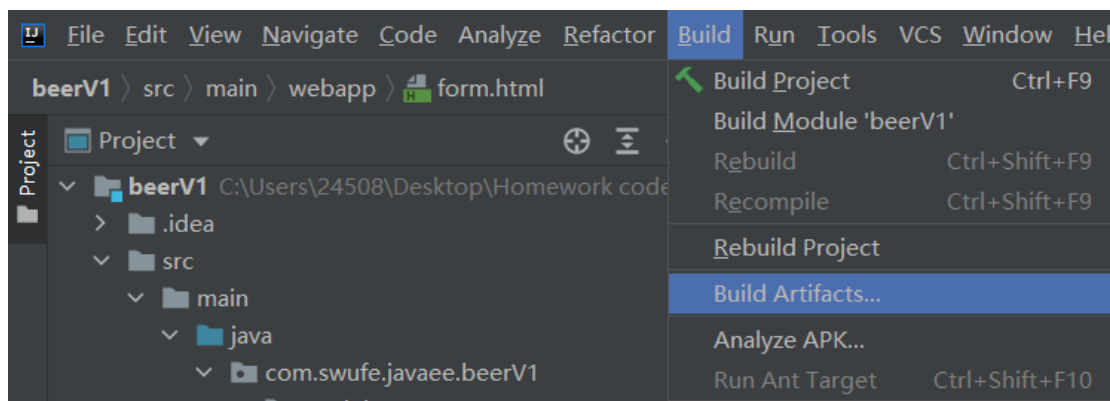

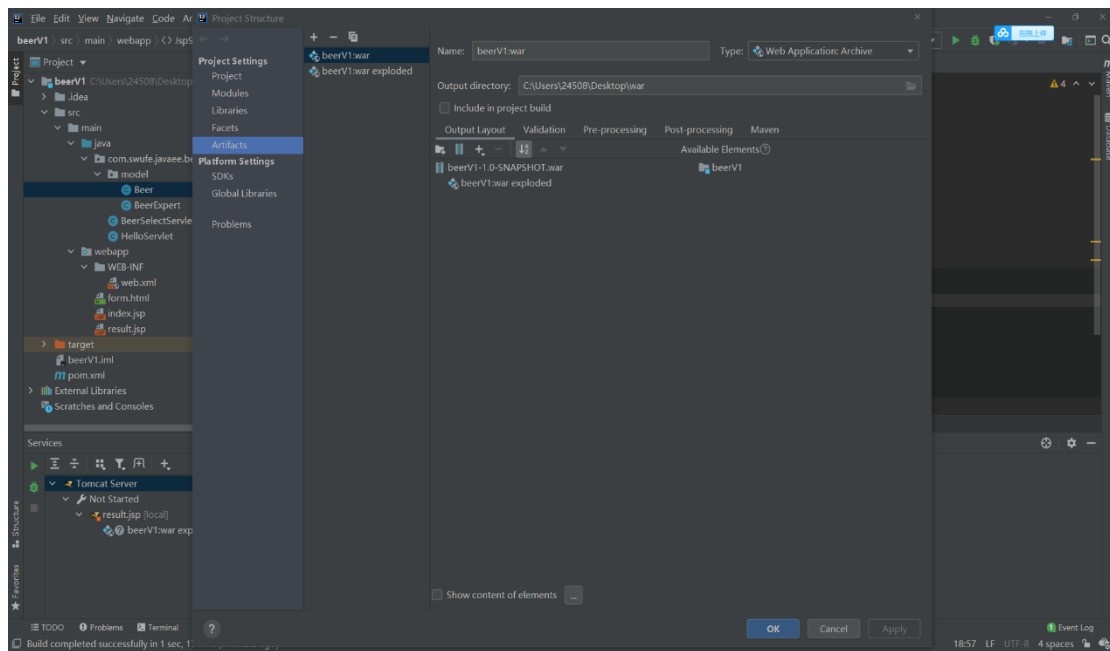

Then, build War. The war will be built in directory we set in the first step.

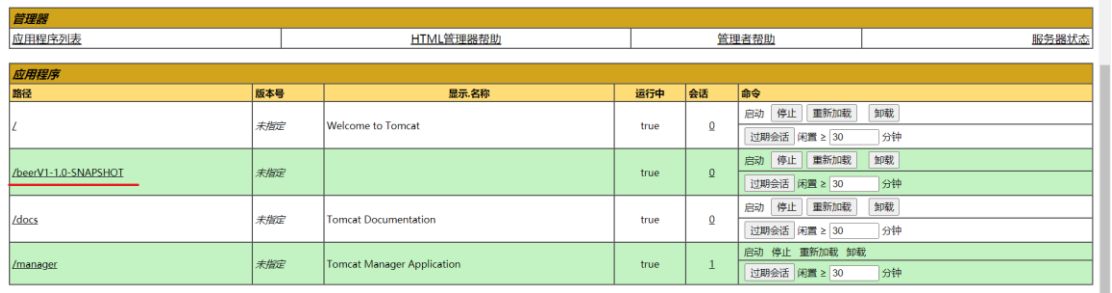

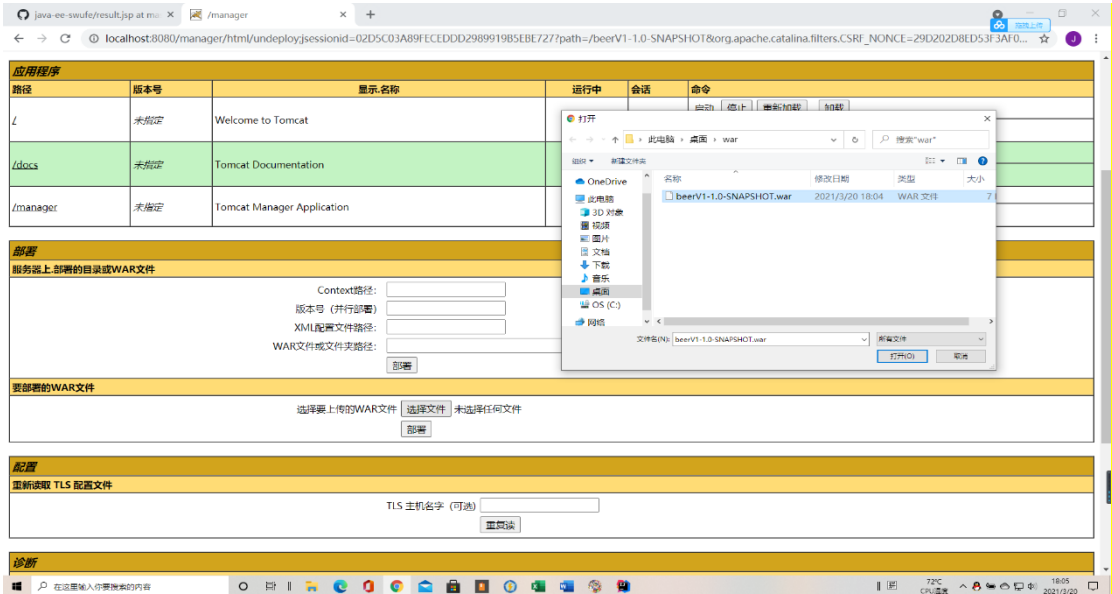

Next, Deploying the WAR file. Open Tomcat by host:8080. Press“选择文件“.

Select the war in directory. Press“部署”.

Finally, we finish it.

Here are the recommendations:

try: Jali Pale Ale  
Year of birth: 1966  
Country: France

try: Gout Stout  
Year of birth: 1997  
Country: Italy
